Adobe XD  
Illustrator  
InDesign  
Photoshop  
Premiere Pro

## Coding Languages

Html  
CSS  
JavaScript  
Processing

## Languages

Tagalog  
English

## Course Projects

### Product Design and User Interface Design

Spring 2020 | User Experience and Visual Designer

Designed a device that facilitates meaningful communications between individuals separated by Covid-19 and alleviates the pains and challenges from long periods of isolation.

- Integrated voice and tangible interactions that users could rely on to feel less lonely in times when their support systems are not available.
- Created different limitations for users sending messages to their loved ones to foster intentionality and purpose in every message.

### Product Design and Augmented Reality Concept

FALL 2019 | UX Researcher + Visual Designer

Conceptualized a new experience for tourists visiting Venice beach by creating a wearable that guides users along the bike path to help avoid accidents and collisions.

- Introduced augmented reality (AR) technology that provides visual feedback to users through their AR glasses based on the information received from the sensors placed around the Venice beach bike path.

## Work Experience

### Santa Monica College IxD Department, Santa Monica, Ca

September 2019 - Current

Social media coordinator focused on keeping the students engaged and informed by communicating the latest events happening around campus.

### CodeTenderloin, San Francisco, Ca.

June 2019 - July 2019

Instructor at a non-profit that taught at-risk-youth front-end programming skills using HTML, CSS, and Javascript.

## Leadership Experience

### Santa Monica College Design Club

July 2020 - Current

Social media coordinator focused on keeping the students engaged and informed by communicating the latest events happening around campus.

### LAVote.net Website Redesign

August 2020 - Current

Creative and brand strategy lead responsible for facilitating workshops that helped inspire the project towards creating a guided voting experience.
